

i don't like any & everyone having access & using my personal & private information without my consent, however, with today's technology & laws we have very little rights allowing us to protect our privacy & the process we must go through to exercise our right to privacy is so tedious & confusing most of us don't have the entire day require to complete these processes therefore leaving us still vulnerable. So by no means DO NOT WEAKEN THE DO NOT CALL REGISTRY LAW. Let us maintain whatever right to privacy we still have. I feel so violated whenever i receive calls from complete strangers, in which the only interest i have in them or their services is how & where did you get my number & please take it off your list!!! I will never purchase or use any services from anyone contacting me without my consent.  
Thank you.
